ABOUT ME

I am a Cloud Computing enthusiast with practical experience in AWS and Linux. I have built and deployed cloud projects involving EC2, S3, IAM, security groups, and automation using shell scripting. I am continuously improving my skills in cloud infrastructure and DevOps practices and looking for opportunities to work on scalable and secure cloud solutions.

EDUCATION

Master of Computer Application
Patliputra University 2025–2027

Bachelor of Computer Application
Aryabhatta University 2021–2024

PROJECTS

Professional-Level Cloud Web Application Deployment

- Designed and deployed a scalable cloud web application architecture on AWS.
- Hosted static frontend on Amazon S3 integrated with a CDN for fast global content delivery.
- Deployed backend services on EC2 instances with Auto Scaling for high availability.
- Configured Application Load Balancer to distribute traffic efficiently.
- Managed infrastructure using Terraform and implemented secure networking with VPC.

Smart Serverless Automation Pipeline

- Built an event-driven serverless architecture using AWS services.
- Configured S3 bucket upload triggers to invoke AWS Lambda functions automatically.
- Implemented automated data processing workflows using Python.
- Stored processed data in DynamoDB for scalable storage.
- Implemented monitoring and error alerts using AWS CloudWatch.

Enterprise-Grade Kubernetes Deployment

- Containerized a REST API application using Docker.
- Deployed the application on Kubernetes cluster for scalability.
- Implemented auto-scaling and load balancing.
- Used Terraform for infrastructure provisioning.
- Configured monitoring and logging for production reliability.

SKILLS

AWS
Linux
Docker
Bash Scripting
Python
SQL Database
Problem Solving
SMTP Infrastructure

CERTIFICATIONS

AWS Cloud Practitioner Essentials
Forage AWS Cloud Associate Internship
